SUMMARY

Full stack developer with 5+ years shipping production systems, including **3+ years working fully remotely for Singapore-based companies**. Specialized in AI engineering: LLM integrations, agentic workflows (LangChain/LangGraph), and AI-assisted development with Claude Code. Strong end-to-end ownership, from architecture and backend design to deployment and monitoring.

WORK EXPERIENCE

AI Engineer / Full Stack Developer (Remote) SGID, Singapore **Apr 2025 - Present**

- ▶ Build and deploy **AI-powered services and APIs** in production; integrate LLM workflows with LangChain and LangGraph.
- ▶ Design scalable backends for AI inference and automation; optimize API **performance, latency, and reliability**.
- ▶ Ship full-stack features with Node.js, NestJS, and Next.js; integrate Web3 (Solana) services.

Software Engineer (Remote) DV9 International Pte. Ltd., Singapore **May 2023 - Sep 2025**

- ▶ Worked **fully remotely for 2+ years** with a Singapore team, collaborating async across product, design, and ops.
- ▶ Developed two production e-commerce platforms, contributing to a **20% increase in online sales** and 15% faster site performance.
- ▶ Spearheaded NPOS, the central transaction and monitoring hub for both brands; improved responsiveness by **35%** with Laravel and JavaScript.

Technical Founder & Lead Engineer PT Aira Teknologi Indonesia **Apr 2021 - Present**

- ▶ Run a small software agency; personally **architect and build client systems end to end**.
- ▶ Delivered projects for enterprise clients including **KAI (Indonesia's national railway company)** and a national election web and mobile platform.
- ▶ Stack: Laravel, Node.js, Next.js, Go, PostgreSQL, Redis, Docker on self-managed VPS infrastructure.

SELECTED WORK & PRODUCTS

- noelgifts.com** Production e-commerce platform for a Singapore gifting brand (DV9); Laravel and Next.js.
- awetonet.io** Load balancing platform with Proxmox API integration and real-time server monitoring (DV9).
- avora.id** Checkout and creator monetization SaaS for Indonesian sellers; Go, Next.js, PostgreSQL, Redis.
- beta.buat.ai** AI customer service platform (public beta); LLM-powered chat agents for business support and sales.
- airatech.id** Software agency site and product portfolio; web development and AI solutions.
- Crowdfunding dApp** Decentralized crowdfunding on Ethereum testnet with smart contracts and recorded walkthrough.

EDUCATION

B.Sc. in Computer Science, GPA 3.8/4.0 UIN Maulana Malik Ibrahim Malang, Indonesia **2019 - 2022**

- ▶ Top 10 Finalist & Best UI/UX, Hackfest 2022, a national hackathon by Google Developer Student Clubs Indonesia.
- ▶ Led the university's GDSC chapter to Top 5 in Indonesia (1st Best NPS Lead, GDSC Indonesia 2022).

COMMUNITY & SPEAKING

Core Team, Google Developer Group (GDG) Surabaya (2022 - Present). Public Relations, Ngalam Backend Community. Workshop facilitator and technical mentor on AI adoption and backend engineering.

SKILLS

- Languages & Frameworks** TypeScript/JavaScript, Go, PHP, Python | Node.js, NestJS, Next.js, React, Laravel, Fiber
- AI Engineering** LLM integration, LangChain/LangGraph, agentic workflows, prompt engineering, Claude Code
- Data & Infrastructure** PostgreSQL, MySQL, MongoDB, Redis | Docker, CI/CD, AWS, GCP, Cloudflare, VPS ops
- Remote Collaboration** Async written communication, Git workflows, Slack/ClickUp/Jira, overlap with SGT/CET hours
- Languages** English (professional working proficiency), Bahasa Indonesia (native)
